

FACTORY SHOW

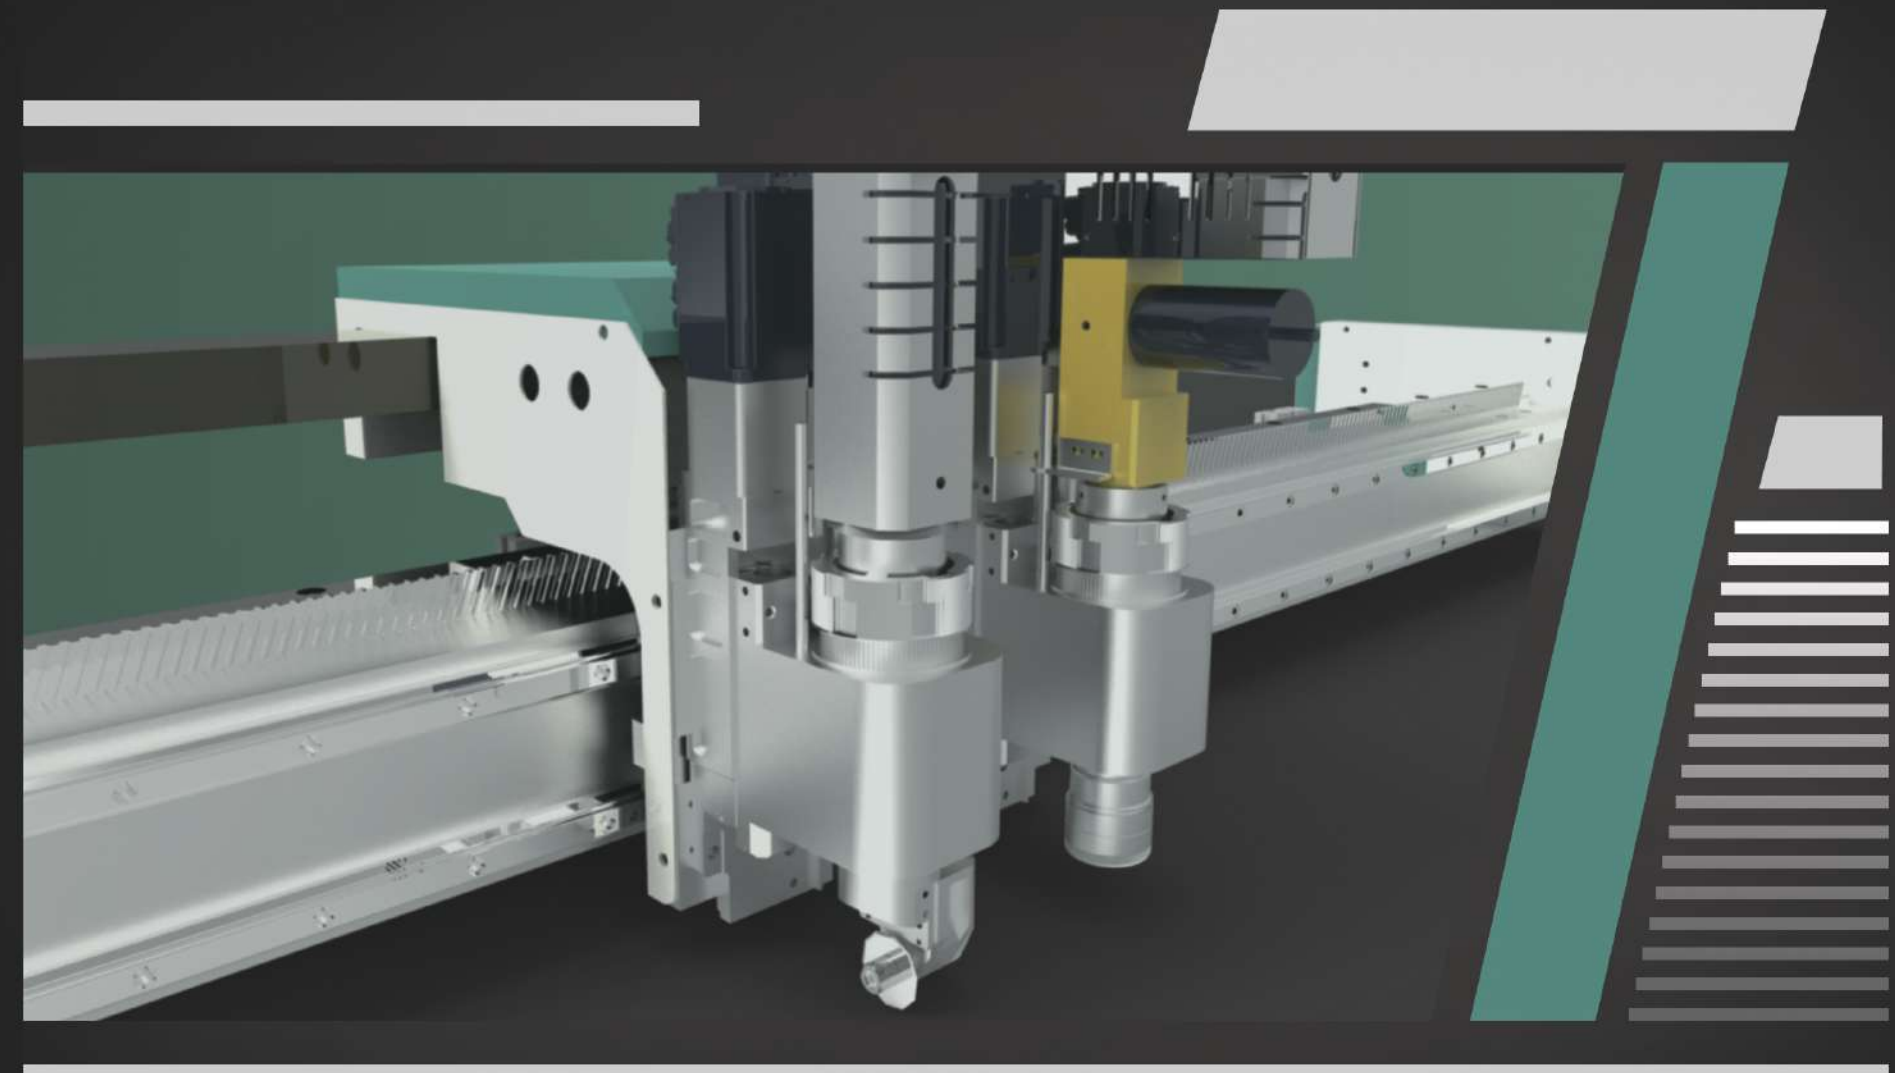

CUSTOMER SHOW

AOL CNC is a high-tech enterprise which specializes in research&development, production, sales, service of the cnc cutting machine. We have a group of top talent who have the rich experience in the development and application, and professional in research & development of the cnc cutting machine. Relying on the advanced technology, keeping up with the trend of intelligent industrial development in the world. AOL products are in all over the country and overseas markets. Our main products include intelligent digital cutting machine and flexible material intelligent cutting machine, Cloth and leather cutting machine, high-tech composite cutting machine. It is widely used in clothing, car interior, cloth sofa, carpet mat, shoes, textile, advertising, packaging, metal and other industries.

Devotes In Creating a Global Leading Brand Of Intelligent Cutting

Focus on Composite fiber material Cutting

# COMPOSITE FIBER MATERIAL CUTTING MACHINE

The knife cutting is without pollution, odorless and green environmental protection cutting

Environmental protection

Stable

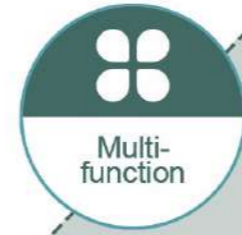

The main components of the machine are imported electrical appliances

It can be operated by one person, with high degree of automation, and can realize automatic spreading, automatic cutting and automatic feeding.

Intelligence

## ADVANTAGES

Multi-function

Can be arbitrarily matched with various tools to achieve cutting, marking, drawing, lettering, creasing, kiss-cutting, full cutting

Intelligent software and fully automatic optimization processing path, configurable intelligent typesetting software can calculate material length, saving materials and reduce costs

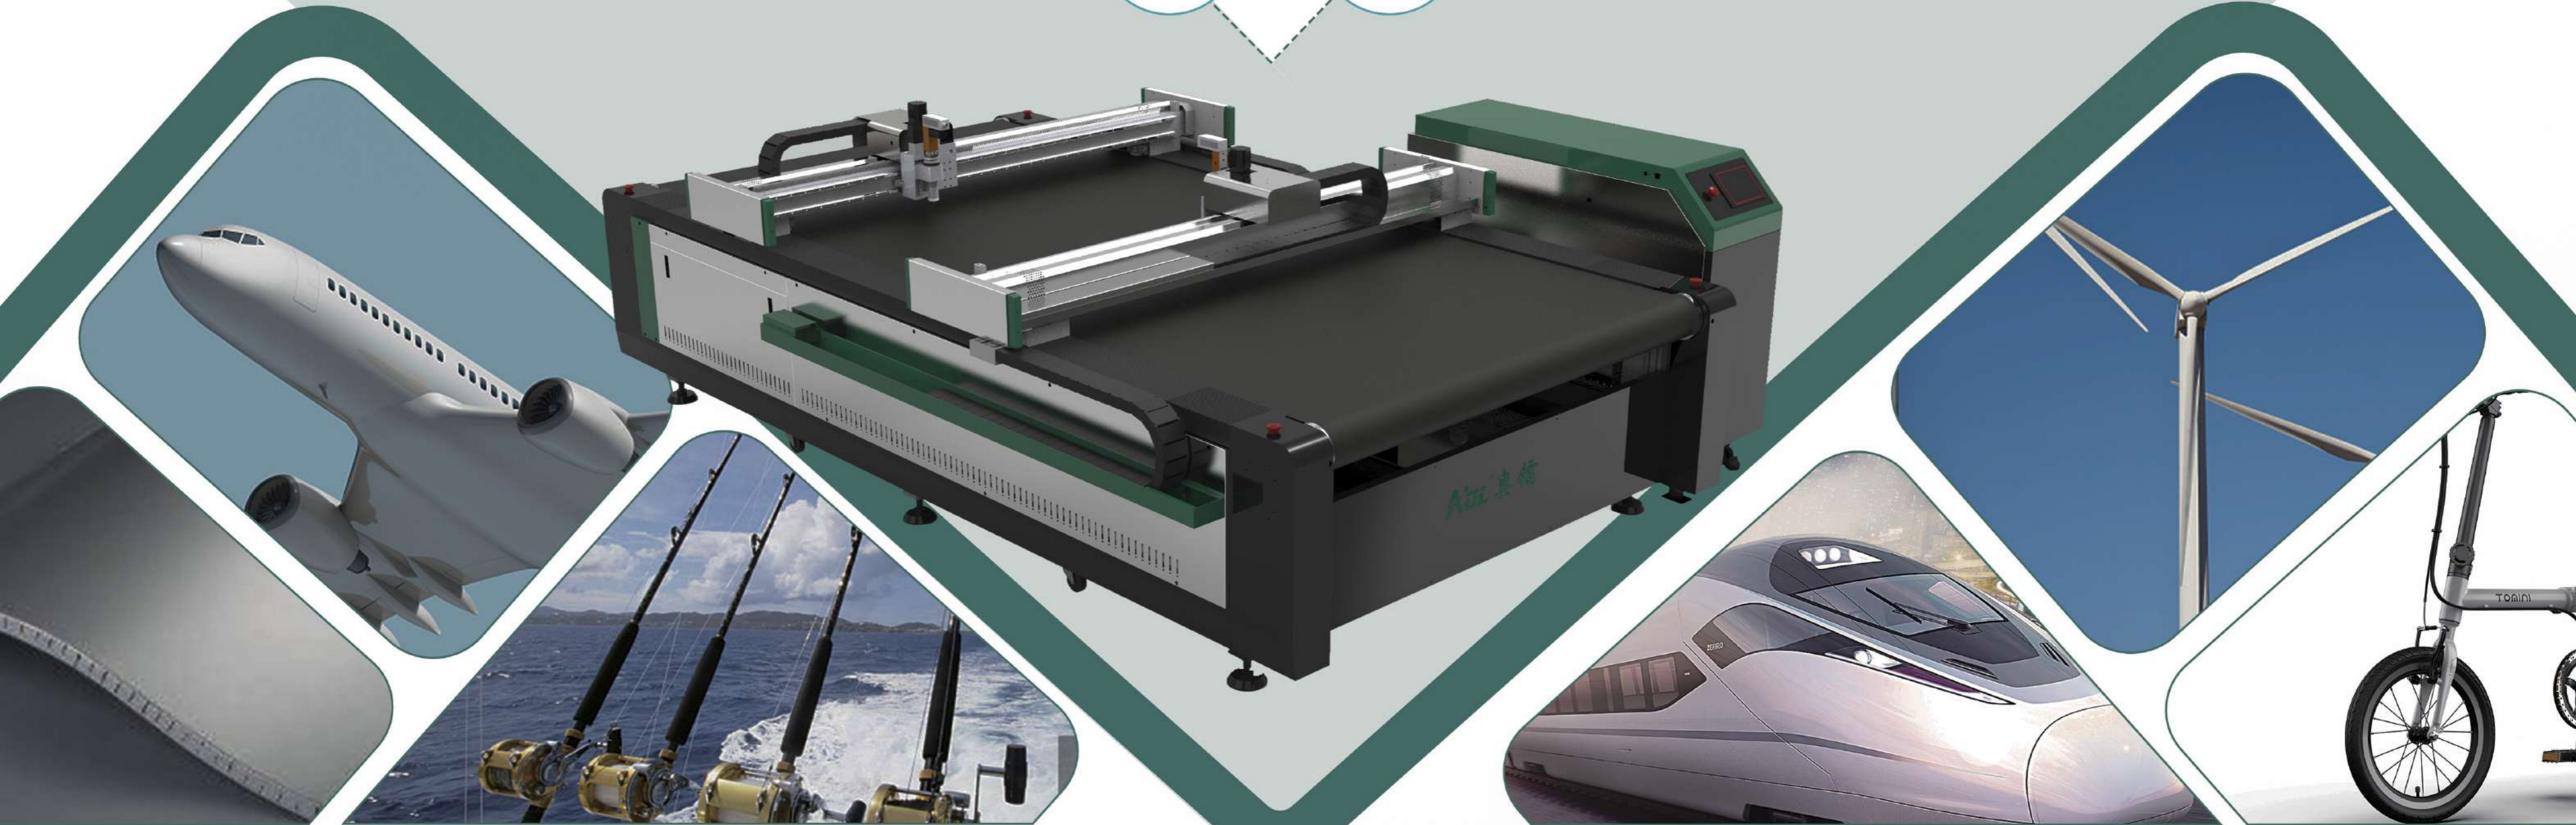

Material saving

Saving manpower

It completely replaces the process of manual design, proofing and cutting, helping you to save a lot of manpower, Steel Rule Die and the cost of material loss

Technical Parameters							
Type	AOL-1625ZS AOL-1825ZS AOL-2125ZS	Cutting Thickness	≤50mm	Machine size	3570*2290*1165 3570*2500*1165 3570*2800*1165	Working area	1600x2500mm 1800x2500mm 2100x2500mm
Feeding way	Auto feeding or flat table (either-or)	Cutting Speed	200-2000mm/s	Material Fixing	Vacuum Adsorption	Driving system	Digital Servo Motor, Linear square guide rail
Cutting tools	Riven Rotary Tool, Oscillating Knife, Drag Knife, Kiss-Cut Toll, Punching Toll, V-CUT tool, Marking Pen, Pneumatic Knife, CCD Camera, Projector, laser Pointing			Applied material	Single / Multi-Layer Glass Fiber, Glass Fiber Cotton, Prepreg, Carbon Fiber, Carbon Fiber Felt, Aramid Fiber and Other Flexible Materials
